RE: Genetic Engineering

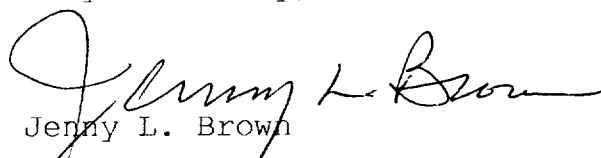

Dear Dr. Friedman:

I wish to strongly protest the genetic engineering of ALL THINGS and, so far as this correspondence is concerned, particularly food supplies.

I am angry and stunned to learn that for over 20 years genetic engineering has been going on and that already huge numbers of foods have been so manipulated.

No one told me about it; no one asked me if I wanted to eat genetically altered foods; no labels have even been put on food stuffs to that I can have a choice. And this is supposed to be America, land of the free...I don't think so!

Very sincerely,

Jenny L. Brown
